About ProoMak

ProoMak Industrial Solutions is a premier provider of turnkey industrial production line solutions. We specialize in the design, manufacturing, and installation of high-performance machinery across multiple industries. With a strong focus on quality, efficiency, and customization, we support our clients throughout the entire project lifecycle—from project planning and engineering to installation, commissioning, and comprehensive after-sales service.

Our Mission

To empower manufacturers with cutting-edge technology that maximizes productivity and minimizes waste through engineering excellence.

Global Reach

Serving clients worldwide with localized support and a commitment to delivering world-class industrial solutions across all continents.

Injection Molding Production Line

High-efficiency production lines designed for the manufacture of precision plastic parts with consistent and reliable quality. Engineered to ensure stable operation, high repeatability, and cost-effective mass production for the packaging, automotive, electronics, and consumer goods industries.

Plastic Pipe Production Line

A complete manufacturing system designed for the continuous production of plastic pipes in various diameters and materials, including PVC, HDPE, and PPR. The line integrates extrusion, forming, cooling, cutting, and control systems to ensure high efficiency, stable performance, and consistent product quality.
